

ATLAS GROUP

The Atlas Group is a significant stockist and distributor of large mains, bells, communication, overhead cables and general wires as well as overhead line hardware and accessories and general lead wire and products associated with electrical distribution.

Based in Alrode, Gauteng, the new Atlas Group premises, which exceed 30 000m², allow for optimised distribution and warehousing of our wide product ranges.

Atlas Group typically holds in excess of R150-million in stock, making it ideally positioned to supply customer demand with a short turnaround time, using the company's own crane trucks to transport or deliver orders.

All products carried by Atlas are SABS approved and overhead line hardware is Eskom certified. Atlas also has a range of Eskom-standard products for export purposes.

Cable, Power, Industrial & Electrical Supplies

PRODUCT OFFERING

Atlas Group offers electrical power cables, distribution and reticulation material and complementary equipment. Included in the offering are power cables, ACSR, XLPE, ECC, ABC, Airdac, and a wide range of cable accessories such as joint kits, glands, lugs, ferrules, cable cutters and crimpers.

Associated accessories include prepaid meters and STS bases, ready boards, pole-top boxes, meter kiosks, distribution class transformers, surge arrestors, drop-out fuse switches and isolators, wire-formed products, insulators, galvanised steel fittings and brackets, cross-arms, stay assemblies, safety equipment, tools, testers, ladders, transformers, mini-substations and many other products.

DISTRIBUTION/TARGET MARKET

Atlas Group distributes nationally through the electrical wholesale network as well as selected large electrical contractors, municipalities, mines, construction and the agricultural sector.
