

T860

- 3-Phase and Motor Rotation Indicator
- Test rotation of unconnected motors
- Heavy duty alligator clips
- Open phase identification
- Phase presence
- Colour coded: Red/White/ Blue

Technical Overview

Operating Voltage	100 to 600V AC
Operating Frequency	45 to 75Hz
Circuit Structure	Electronic
Operating Temperature	0°C to 50°C
Humidity	90% Max Relative Humidity
Power Consumption (Correct)	±14mA for motor rotation field test ±7mA for Phase rotation field indication

Model Specification

Standard Accessories	Carry Pouch
Certificates	Certificate of Conformance
